

# LocoFi™ Controller App

**FREE!**

Available on

Google Play

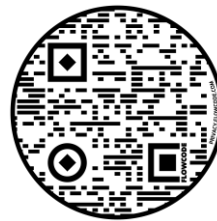

## Key Features

1. Supports Android 5.0+
2. Easy setup without any CV programming
3. Run multiple trains simultaneously
4. Monitoring with precision and versatility:
  - Speedometer
  - Name your locomotive
  - Know who is running which trains
5. Haptic controls provide throttle feedback without having to look at the screen
6. Prototypical operation
7. Now with **CONSISTING!**

# LocoFi™ (1<sup>st</sup> Generation)

LocoFi™ (1<sup>st</sup> Generation) changed the paradigm in model locomotive control in 2017, for the first time in almost 3 decades. Combined with the FREE LocoFi™ Controller App, model railroaders discovered a simpler and more fun way to run their trains, and voted LocoFi™ as the 2019, 2020 Model Railroader Reader's Choice Winner!

## Key Features

1. Dimensions: 3.44" x 0.67" / 87.4mm x 17.1mm
2. Runs on DC (9V – 24V) / DCC
3. Supports home / club WiFi network; Internet not required
4. Dual micro-controller powered architecture
5. Dedicated micro-controller for sound processing
6. Acoustically matched enclosure
7. Sounds on removable MicroSD card are user configurable and customizable
8. Firmware updateable through app over WiFi
9. Prototypical behavior

LocoFi™ (1<sup>st</sup> Gen) Module: MSRP ~~\$140~~ \$120

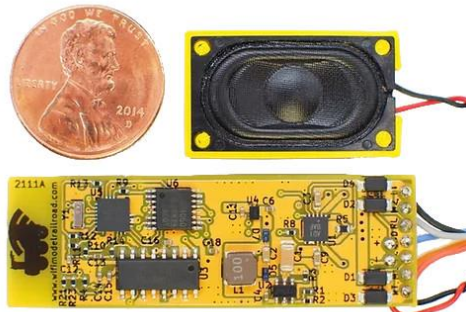

# LocoFi™ 3

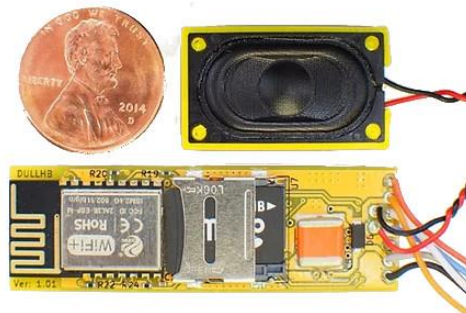

## Improved Reliability, Better Performance in an even Smaller Package

Now experience the magic of LocoFi™ technology in an even smaller form factor, ensuring no HO scale locomotive gets left behind. Compared to LocoFi™ (1<sup>st</sup> Generation), **LocoFi™ 3** is:

- Dimensions: 1.98" x 0.64" (50.3mm x 16.3mm)
- Smaller by more than 40% on its longest side
- Smaller by more than 60% in volume
- Lower start voltage of 7V!
- More reliable WiFi communication
- Support for **STEAM** sounds!

LocoFi™ 3 Module: MSRP \$132

# Amrit™

## The Immortality Solution for Dead Rail and Dirty Track

Amrit™ provides battery-backed Uninterrupted Power Supply (UPS) solution for all your LocoFi™ equipped locomotives. Great for dirty track issues, dead rail and similar applications, it keeps your LocoFi™ed locomotive running on battery power during those precious micro-seconds when it loses contact or power due to dirty track issues. It fits HO scale locomotives and powered rolling stock, including lighted passenger cars and cabooses.

### Amrit™ "solution" consists of three potions:

1. **Amrit™ Module:** This amazingly tiny module sits between track power and the LocoFi™ module.
2. **LiPo Battery:** Included 150mAh battery provides enough power to last 5 minutes\* for a typical HO locomotive in dead rail scenarios.
3. **Magnetically Activated Switch:** Wired into the module, is a tiny switch, accessible to be remotely operated by a "magnetic wand".

Amrit™ Module with Battery: MSRP \$44
